

With the wide range of designs, applications, costs and appearances, making the right decision for interior or exterior metal cladding wall systems can be overwhelming. Lindsay has more than 35 years of experience installing metal walls and roofs on conventional and pre-engineered structures.

We can put this experience to work for you and help turn your difficult choices into winning solutions.

Lindsay will choose the optimal system for each scenario we encounter. Our crew has worked with everything from pre-painted steel sheets to complex concealed-fastened panel systems with interlocking ribs. We've applied vapour barrier and insulation to improve thermal efficiency and installed award-winning copper roofing on historical buildings.

*(continued on reverse)*

**“Our existing building received a much-needed facelift thanks to the skilled craftsmanship and attention to detail that Lindsay provided...”**

– Gary Brimble *World Trade and Convention Centre*

Our highly skilled tradespeople, commitment to safety, experience and ability to adapt to industry changes have made the Lindsay Cladding Group your first choice for:

- metal cladding & roofing installation
- repairing leaks
- upgrading insulation
- updating the look of your existing building
- improving building functionality
- creating a more impressive facade

Whatever the project, we'll evaluate your options and choose the system that works best for your budget, your performance expectations and aesthetics.
