

When William F. White International chose to completely renovate a former Via Rail storage space to house their new offices, they looked to Lindsay's millshop to complete the project.

Like many of our clients, this respected film, television and theatre equipment supply company needed a reception counter as the finishing touch. The Lindsay millshop produced the attractive and functional counter, a compliment to the contemporary new facility.

Our recently expanded 3000 square foot millshop works with all types of synthetic and traditional millwork materials to provide a complete range of:

- Custom millwork
- Cabinetry
- Shelving
- Wood door frames and trim
- Custom trims

Our shop specializes in custom work built to suit our clients' specific needs.

**“They did a fine job and designed it with me. It was quite a wonderful experience.”**

– Kris Gilbert *Marketing Manager, WFW International*
