

Our Service Work specialties provide a one-stop solution for building maintenance and upgrading. For everything from small fix ups to mid-size office renovations, we manage each job using our own in-house services including carpentry and drywall, roofing, cladding, millwork, asbestos abatement, mold removal, and concrete sawing and coring. By using our own service team, scheduling is simplified and the work is completed with minimal disruption to business operations. We provide one-on-one service to all of our commercial, institutional and industrial clients since “we are as much about client maintenance as we are building maintenance.” (Karl Wyllie Superintendent, J.W. Lindsay Enterprises)

“For many years Lindsay has been included on the Oland Brewery bidders’ list for both major new installations and minor renovations. During this time a working relationship, that has been beneficial to both parties, has grown. We look forward to continuing this relationship in the years to come.”

– Chuck Bennett *Engineering Services Manager, Oland Brewery*
